

Chapz for Tanning

A Spray tan at Chapz is a great way to achieve a healthy bronzed look, without the need to expose the body to the effects of the sun or other forms of UVA and UVB rays.

The results of the spray tan are impressive, and it only takes about 20 minutes!

How does it work?

- The tanning solution is sprayed onto the skin to ensure an even application. An active ingredient in the solution is called Dihydroxyacetone or DHA. The DHA causes a chemical reaction with the amino acids on the top layer of the skin, to produce an impressive bronzed tanned look.

- The Tan can last for up to 7 days depending on lifestyle and skin type. Regular moisturising after the tan will help to prolong the look.

- The Spray Tan at Chapz keeps you looking and feeling good.

- Ideal for special occasions too, like weddings, birthdays etc.

- We are able to offer a special rate for parties of 6 or more.

- Please be aware that the spray tan offers NO protection against the sun ! For more information, and to book your Spay Tan, please come in and see us at the Salon.

We look forward to meeting and tanning you soon !For more information, please pop in for a chat or contact us by email or phone. info@chapzbarbers.com - 07901834300 This e-mail address is being protected from spam bots, you need JavaScript enabled to view it
